1	Graphene, Not Just Another Science Fantasy: Exploring the Real World Industrial Applications	1
2	Graphene Edges: Physics and Applications toward All Carbon Magnetism and Spintronics	7
2.1	Introduction.....	7
2.2	Experimental Results and Discussion.....	8
2.2.1	Sample Fabrication and Characterisation.....	8
2.2.2	Evidence for Presence of Zigzag Pore Edges.....	12
2.2.3	Ferromagnetism Due to H-Terminated Pore Edges.....	13
2.2.4	Theoretical Discussion of Edge Magnetisation Values.....	16
2.2.5	Possibility of other Stable Edge-Atomic Structures and of other H-Termination Type with Stable Magnetism under Pressure	17
2.3	Novel Spin-phenomena in Few-layer Graphene Nanopore Arrays	19
2.4	Conclusion.....	22
3	Graphite Surface in Noncontact Scanning Nonlinear Dielectric Microscopy	27
3.1	Introduction.....	27
3.2	Method and Principle of Noncontact Scanning Nonlinear Dielectric Microscopy	27
3.2.1	Apparatus of Noncontact Scanning Nonlinear Dielectric Microscopy and Principle of Scanning Nonlinear Dielectric Microscopy	28
3.2.1.1	Relationship between Capacitance and Scanning Nonlinear Dielectric Microscopy.....	28

	3.2.1.2	Infinite Series Expansion of Capacitance-Voltage Curve	34
	3.2.1.3	Method of Noncontact Scanning Nonlinear Dielectric Microscopy	36
	3.2.2	Current Signal in Noncontact Scanning Nonlinear Dielectric Microscopy	37
3.3		Observation of Graphite Surface by Noncontact Scanning Nonlinear Dielectric Microscopy	39
	3.3.1	Graphite Surface	39
	3.3.2	Topographical and First-order Amplitude Images in Graphite	41
	3.3.2.1	Experimental Condition	41
	3.3.2.2	Topography and Error Image	41
	3.3.2.3	θ_1 Image	43
	3.3.2.4	A1 Image	43
	3.3.3	Relationship between Current Image and Scanning Nonlinear Dielectric Microscopy Images.....	45
	3.3.3.1	Scanning Nonlinear Dielectric Microscopy Images.....	45
	3.3.3.2	Current Image in Noncontact Scanning Nonlinear Dielectric Microscopy	46
	3.3.4	Two Pattern Images in Graphite.....	48
3.4		Capacitance Induced by Tunnelling between Atomic Surface and Probe Tip	50
	3.4.1	Relationship between Electrochemical Capacitance and Density of State.....	52
	3.4.2	First- and Second-order Electrochemical Capacitances.....	63
	3.4.3	Electrochemical Capacitance with Tunnelling	65
	3.4.4	Conversion of Capacitance into Scanning Nonlinear Dielectric Microscopy Signals	71
	3.4.5	Calculations of Scanning Nonlinear Dielectric Microscopy Signals	75

3.4.5.1	Relationship between Odd and Even Components in Density of State and Scanning Nonlinear Dielectric Microscopy Signals.....	76
3.4.5.2	Phase Reversal in θ_{2k-1}	79
3.4.6	Origin of Scanning Nonlinear Dielectric Microscopy and Current Signals of Graphite in Noncontact Scanning Nonlinear Dielectric Microscopy	83
3.4.6.1	Scanning Nonlinear Dielectric Microscopy Signals of Graphite.....	83
3.4.6.2	Current Signal of Graphite.....	85
3.5	Conclusion.....	87
4	Numerical Modelling of Mechanical Behaviour of Graphene.....	91
4.1	Introduction.....	91
4.2	Basics of Computational Methods	92
4.3	Structural Defects in Graphene	93
4.3.1	StoneñWales Defect.....	94
4.3.2	Single/Multiple Vacancies.....	96
4.3.3	Grain Boundaries.....	97
4.4	Morphology of Graphene	100
4.4.1	Intrinsic Morphology.....	100
4.4.2	Extrinsic Morphology.....	105
4.5	Mechanical Properties of Graphene	110
4.5.1	Fundamental Properties	110
4.5.2	Effect of Defects on Mechanical Properties	113
4.5.3	Fracture and Failure Mechanisms	117
4.6	Summary	118
5	Photonic Applications of Graphene and Its Composites.....	125
5.1	Introduction.....	125
5.2	Parameters of Interest in Photonics: Refractive Index and Polarisation.....	127

5.2.1	Refractive Index and its Intensity Dependence	127
5.2.2	Refractive Index-induced Changes in Polarisation.....	129
5.3	Phenomenon of Saturable Absorption.....	129
5.3.1	Spectroscopic Description of Saturable Absorption.....	129
5.3.3	Reverse-saturable Absorption	132
5.3.3.1	Excited State Absorption.....	133
5.3.3.2	Free Carrier Absorption	135
5.3.3.3	Two-photon Absorption.....	135
5.4	A Typical Application of Saturable Absorption Materials in Photonics: Passive Mode-locking Technique	136
5.5	Techniques to Characterise Saturable Absorption Materials	137
5.5.1	Steady-state Absorption Spectra.....	137
5.5.2	Experimental Determination of Nonlinear Optical Parameters	137
5.5.2.1	Degenerate Four-wave Mixing Techniques	138
5.5.2.1.1	Self-diffraction Geometry.....	138
5.5.2.2	Phase Conjugation Geometry	140
5.5.2.3	Z-scan Technique	141
5.6	Materials for Saturable Absorption Applications	143
5.6.1	Conventional Materials: Organic Dyes	143
5.6.2	Semiconductor Materials	145
5.6.3	Metal Nanoparticles	146
5.6.4	Carbon Nanotubes	147
5.6.5	Graphene Composites as Mode-lockers	148
5.6.5.1	The Band Diagram.....	148
5.6.5.2	Figure of Merit for All-optical Switching Applications.....	151
5.7	New Studies on Silver-nanoparticle Embedded Graphene	152
5.7.1	Characterisation of Graphene and Silver-nanoparticle/ Graphene	152
5.7.1.1	Absorption Spectra	152

5.7.1.2	X-ray Diffraction Spectra	153
5.7.1.3	Raman Spectra	153
5.7.2	Z-scan Studies on Graphene Composites	155
5.7.2.1	Z-scan Profiles at 1064 nm	155
5.7.2.2	Z-scan Profiles at 532 nm	158
5.7.2.3	Modification of the Band Diagram of Graphene-metal Nanoparticles Composites	160
5.7.3	Optical Limiting Region	162
5.8	Charge Transfer Interaction between Graphene and Fluorescent Dyes	163
5.8.1	Fluorescence Quenching of Dye in the Presence of Graphene	163
5.8.2	Dye in the Presence of Silver Nanoparticles	165
5.8.3	Dye in the Presence of Silver-decorated Graphene	165
5.9	Concluding Remarks and Future Prospects	166
6	Graphene/Metal Self-assemble into Core-shelled Composite Nanostructures	175
6.1	Introduction	175
6.2	Self-scrolling of Graphene Induced by Nickel Nanostructures	176
6.2.1	Computational Methods	176
6.2.2	Results and Discussion	177
6.3	Self-scrolling of Graphene Induced by Iron Nanostructures	184
6.3.1	Computational Methods	184
6.3.2	Results and Discussion	187
6.3.2.1	The Spontaneous Scrolling of Graphene Nanosheet	187
6.3.2.2	Interface Characteristics	189
6.3.2.3	The Mechanism	192
6.3.2.4	The Thermodynamic Model	197

7	Advanced Structural Modelling of Graphene Based Nanomechanical Systems	207
7.1	Introduction and Scope	207
7.2	Modelling of Nanostructures	208
7.3	Popular Approaches for Understanding Graphene	209
7.3.1	Experimental Methods.....	209
7.3.2	Molecular Dynamics Simulations.....	210
7.3.3	Continuum Mechanics Approach	210
7.3.4	Failure of Classical Continuum Mechanics in Graphene	211
7.4	Concept of Nonlocal Elasticity.....	212
7.5	Mathematical Formulation of Nonlocal Elasticity.....	213
7.5.1	Integral Form.....	213
7.5.2	Nonlocal Modulus.....	215
7.5.3	Differential Form Equation of Nonlocal Elasticity	215
7.6	Nonlocal Elastic Theories for Graphene Sheets.....	216
7.6.1	Development of Nonlocal Constitutive Relations.....	217
7.6.2	Free Vibration of Single-layer Graphene Sheets.....	220
7.6.2.1	Transverse Free Vibration	220
7.6.2.2	Graphene Sheets Embedded in Elastic Medium	223
7.6.2.3	Vibration of Double-graphene-sheet-systems.	226
7.6.2.4	Synchronous and Asynchronous Vibration of Double-graphene-sheet-systems.....	228
7.6.2.5	Axially Stressed Graphene.....	231
7.6.2.6	In-plane Vibration of Graphene Sheets.....	232
7.6.3	Nonlocal Buckling of Graphene Sheets	234
7.6.3.1	Uniaxial Buckling.....	234
7.6.3.2	Graphene Sheets Embedded in Elastic Medium	235
7.6.3.3	Buckling of Double-graphene-sheets Systems	237
7.7	Nonlocal Elasticity Theory versus Molecular Dynamics.....	239

7.8	Mechanism of Nonlocal Effects in Graphene	240
7.9	Summary and Conclusion	241
8	Catalysis by Graphene and Related Materials	247
8.1	Introduction.....	247
8.2	Synthesis	249
8.3	Characterisation	250
8.4	Heterogeneous Catalysis	251
8.4.1	Graphene-based Materials as Acid Catalysts.....	252
8.4.2	Graphene-based Materials as Base Catalysts.....	255
8.4.3	Graphene-based Materials as Oxidation Catalysts.....	256
8.4.4	Graphene-based Materials as Reduction Catalysts.....	258
8.5	Concluding Remarks and Future Prospects	260
9	Thermal Properties of Graphene ñ Applications in Thermal Management	265
9.1	Introduction.....	265
9.2	Thermal Properties of Graphene and Few-layer Graphene.....	265
9.3	Graphene-based Thermal Interface Materials.....	273
9.4	Graphene Quilts for Thermal Management of High-power Transistors	277
9.5	Conclusions	284
10	Towards Biosensing with Graphene-based Materials.....	293
10.1	Introduction.....	293
10.2	Synthesis of Graphene and Reduced Graphene Oxide.....	295
10.3	Graphene-based Materials for Electrochemical Biosensing of Clinical Analytes.....	298
10.3.1	Biosensing of Glucose	299
10.3.2	Biosensing of Cholesterol.....	306
10.3.3	Electrochemical Immunosensing	308
10.4	Graphene-based Bio-field Effect Transistors.....	312

10.5	Graphene-based Platform for Impedimetric Biosensing.....	316
10.6	Optical Sensing based on Graphene-based Materials	318
10.6.1	Optical Immunosensing	319
10.6.2	Biosensing Based on Fluorescence and Chemiluminescence Resonance Energy Transfer	320
10.6.3	Graphene-promoted Optical Sensing of Bioanalytes.....	323
10.7	Conclusion and Perspectives	324
11	Graphene-based Polymer Nanocomposites by <i>In Situ</i> Polymerisation or Surface Functionalisation.....	333
11.1	Introduction.....	333
11.2	Synthesis of Graphene for Composite Filler	334
11.2.1	Direct Exfoliation of Graphite	334
11.2.2	Chemical Vapour Deposition	335
11.2.3	Chemical Reduction and Functionalisation of Graphene Oxide Platelets.....	335
11.3	Preparation of Graphene-based Polymer Nanocomposites.....	335
11.3.1	Noncovalent Dispersion Methods: Solution and Melt Mixing	337
11.3.2	Covalent Functionalisation between Graphene and Polymers.....	337
11.3.3	Other Methods for Composite Preparation.....	341
11.4	Morphology and Compatibilisation Behaviour	343
11.5	Properties of Graphene-based Polymer Nanocomposites.....	345
11.5.1	Electrical Properties	345
11.5.2	Mechanical Properties.....	349
11.5.3	Thermal Conductivity and Thermal Stability	352
11.5.4	Improvement in the Glass Transition Temperature.....	354
11.5.5	Flame-retardant Properties.....	354
11.5.6	Gas-barrier Properties.....	355
11.6	Summary and Prospects	356

12	Applications of Graphene and Graphite Oxide in Fuel Cells	369
12.1	Introduction.....	369
12.2	Graphite Oxide Used in Membrane for Proton Exchange Membrane Fuel Cells	373
12.3	Proton Transport Mechanism	375
12.4	Membranes for Low-temperature Proton Exchange Membrane Fuel Cells	377
12.5	Membranes for Intermediate Temperature Proton Exchange Membrane Fuel Cells	379
12.5.1	Membrane Preparation	380
12.5.2	Conductivity	380
12.5.3	Fuel-cell Performance.....	382
12.6	Graphene for Catalysts in Fuel Cells	383
12.7	Challenges and Prospects for Graphite Oxide in Fuel Cells.....	385
12.8	Conclusions	387
13	Design, Preparation and Application of Graphene/Poly(ether ether ketone) (Poly(ether sulfone)) Composites	391
13.1	Introduction.....	391
13.2	Covalent Functionalisation of Chemical Reduced Graphene Sheets.....	392
13.2.1	Diazonium Functionalisation of Chemical Reduced Graphene Sheets	392
13.2.1.1	Preparation of Hydrazine-reduced Graphene	393
13.2.1.2	Preparation of Chemical Functionalised Graphene by Diazonium Functionalisation ...	393
13.2.1.3	Characterisation of Chemical Functionalised Graphene.....	394
13.2.2	Chemical Functionalisation of Chemical Reduced Graphene by Using Residual Oxygen-containing Groups.....	397
13.2.2.1	Preparation of Chemical Functionalised Graphene	397

	13.2.2.2	Characterisation of Graphene and Functionalised Graphene.....	398
13.3		Functionalised Graphene/Poly(ether sulfone) Composites	403
	13.3.1	The Preparation and Electrical Properties of the Functionalised Graphene/Poly(ether sulfone) Nanocomposites	403
	13.3.1.1	Direct Current Electrical Conductivity Study	404
	13.3.1.2	Alternating Current Electrical Conductivity Study.....	407
	13.3.1.3	Dielectric Constant Measurement	409
	13.3.1.4	Impedance Spectroscopy Study.....	409
	13.3.2	Preparation of Hybrid Poly(ether sulfone) Composites ..	414
13.4		Synergetic Effects of Functionalised Graphene and Functionalised Multiwalled Carbon Nanotubes on the Properties of Poly(ether sulfone) Composites	416
	13.4.1	Preparation of Functionalised Multiwalled Carbon Nanotubes	416
	13.4.2	Preparation of Functionalised Graphene Functionalised Multiwalled Carbon Nanotubes Poly(ether sulfone) Composite Films	416
	13.4.3	Characterisation of Functionalised Multiwalled Carbon Nanotubes and Functionalised Graphene-Functionalised Multiwalled Carbon Nanotubes ($W_{f-G}/W_{f-MWCNT} = 1:1$)	417
	13.4.4	Comparison of Five Different Carbon Materials as Conductive Filler in Poly(ether sulfone) Composites	419
	13.4.5	5.0 wt% Functionalised Graphene-Functionalised-Multiwalled Carbon Nanotubes/Poly(ether sulfone) Composites with Different Weight Ratios of Functionalised Graphene and Functionalised-Multiwalled Carbon Nanotubes	425
	13.4.6	Functionalised Graphene-Functionalised Multiwalled Carbon Nanotubes ($W_{f-G}/W_{f-MWCNT} = 1:1$)/Poly(ether sulfone) Composites.....	429
13.5		Application and Preparation of Noncovalent Functionalised Graphene Oxide	431

13.5.1	Functionalisation of Graphene Oxide and Preparation of Functionalised Graphene/Poly(ether sulfone) Composite Films	431
13.5.2	Mechanical Properties of Functionalised Graphene/ Poly(ether sulfone) Composite Films	432
13.5.3	Graphene/Sulfonated Poly(ether ether ketone) Composites used in Supercapacitors	433
13.5.4	Functionalised Graphene-based Electrodes and Assembly of the Supercapacitor	434
13.5.5	Characterisation of Electrodes and Performance of the Supercapacitor Cell	437
14	Functional Graphene-based Nanomaterials: Rational Synthesis, Engineering of Electrochemical Interface and Related Applications.....	445
14.1	Introduction.....	445
14.2	Electrochemical Synthesis of Graphene-based Nanomaterials	447
14.3	Graphene-based Electrochemical Sensors	450
14.3.1	Amperometric and Electrochemical Impedance Sensors .	450
14.3.2	Other Electrochemical Sensing Platforms with other Techniques	458
14.3.2.1	Photoelectrochemical Sensors.....	458
14.3.2.2	Electrochemiluminescence Sensor.....	460
14.4	Electrocatalysis in Fuel Cells	460
14.4.1	Anode Reaction	461
14.4.2	Cathode Reaction	465
14.5	Supercapacitors.....	469
14.6	Li-ion Battery.....	475
14.7	Conclusions, Opportunities and Perspectives	479
