

# C ontents

1	Plastics Induced Ocean Pollution.....	1
1.1	Microplastics in the Marine Environment.....	2
1.2	Marine Debris threatening the Flora/Fauna in the Sea.....	3
1.3	Entanglement.....	4
1.4	Ingestion.....	5
1.5	Differences between Various Plastics and their Degradability.....	6
1.6	Plastics and Leachants which cause Toxicity.....	8
1.7	Pollution in Beaches and Islands.....	9
1.8	Coastal Clean-up.....	11
1.9	Recyclability Issues.....	14
1.10	British Broadcasting Company (BBC) Report on Plastic Balls.....	15
1.11	Gyres.....	15
1.12	Ocean Pollution and Toxic Chemicals.....	17
2	Marine Biofouling of Polymers.....	21
2.1	Introduction.....	21
2.2	Biofilms.....	23
2.3	Macrofouling and the Effect of the Environment.....	26
2.4	Polymers in Marine Fouling.....	32
2.4.1	Effect of Polymer Properties on Biofouling.....	32
2.4.1.1	The Correlation of Critical Surface Tension and Bioadhesion.....	32
2.4.1.2	Elastic Modulus and Bioadhesion.....	34
2.4.1.3	The Correlation of Polymer Structure and Bioadhesion.....	36

2.4.1.4	Electrostatic Interactions and Adhesion .....	36
2.4.1.5	Surface Roughness and Topology.....	37
2.4.1.6	Thickness.....	37
2.4.1.7	Colour .....	38
2.4.2	Effect of Fouling on Polymers .....	39
2.5	Anti-fouling Technologies .....	42
2.5.1	Historical Methods – Anti-fouling Paint .....	43
2.5.1.1	Insoluble Matrix.....	43
2.5.1.2	Soluble Matrix.....	43
2.5.2	Modern Approaches to Anti-fouling Paints.....	44
2.5.2.1	Tributyltin Self-polishing Copolymer Coatings ..	44
2.5.2.2	Tin-free Self-polishing Copolymer Technology...	46
2.5.2.2.1	Booster Biocides used in Self-polishing Copolymers .....	46
2.5.2.2.2	Natural Products as Biocides .....	48
2.5.3	Alternative Non-toxic Anti-fouling Paints.....	51
2.5.3.1	Enzyme Technology .....	51
2.5.3.2	Non-toxic Anti-fouling Coatings: Non-sticking Foul Release Coating .....	52
2.5.3.3	Non-toxic Polymer Surfaces with Anti-fouling Properties.....	53
2.5.3.3.1	Homogeneous Surfaces .....	53
2.5.3.3.2	Heterogeneous Surfaces.....	57
2.5.3.3.3	Three-dimensional Surfaces .....	63
2.6	Future Trends and Challenges.....	65
3	Biodegradation of Polymers in Marine Environment.....	73
3.1	An Introduction to Biodegradation .....	73
3.2	Factors Affecting Polymer Biodegradation .....	74
3.2.1	Polymer Structure and Morphology.....	76

3.2.2	Composition .....	77
3.2.3	Molecular Weight .....	77
3.2.4	Hydrophobic and Hydrophilic Characteristics .....	78
3.2.5	Additives.....	79
3.2.6	Methods of Synthesis .....	80
3.2.7	Environmental Conditions .....	80
3.3	Types of Polymer Degradation .....	80
3.3.1	Biotic Degradation: Biological – Action of Living Organisms, usually Microbes .....	80
3.3.1.1	Enzymic Hydrolysis .....	80
3.3.1.2	Enzymic Oxidation .....	81
3.3.2	Abiotic Degradation .....	82
3.3.2.1	Thermal Degradation.....	83
3.3.2.2	Thermo-oxidative .....	83
3.3.2.3	Photo-degradation .....	84
3.3.2.4	Photo-oxidative Degradation .....	85
3.4	Biodegradation in Marine Environment .....	85
3.4.1	Presence of microorganisms (Bacteria) .....	85
3.4.2	Nutrients .....	85
3.4.3	Dissolved Oxygen .....	86
3.4.4	Salinity.....	88
3.4.5	Humidity .....	88
3.4.6	Amount of Available Water.....	88
3.4.7	The pH (Chemical Environment, Electrolytes) .....	89
3.4.8	Bio-fouling Community (Biofilm).....	89
3.4.9	Wind Flow Movement and Current Models.....	90
3.4.10	Human Impact.....	92
3.4.11	Exposure to Light (especially Ultraviolet) and Sunlight....	92
3.4.12	Accumulation of Biomass .....	92
3.5	Characterisation of Biodegradation .....	95

3.6	Conclusions .....	96
4	Macrofouling and Bioadhesion of Organisms on Polymers .....	101
4.1	Macrofouling .....	101
4.2	Effect of Macrofouling Organisms on Material .....	102
4.3	Impact of Environmental Factors on Macrofouling.....	103
4.4	Effect of Material Properties .....	107
4.5	Barnacles and their Cement.....	110
4.6	Controlling Biofouling and Macrofouling.....	115
4.7	Bioadhesive and Bioinert Surfaces .....	116
4.8	Conclusions .....	117
5	Disposal of Plastics in the Sea – Policies .....	121
5.1	Introduction.....	121
5.2	Plastics in Sea.....	123
5.2.1	Sources – Land-based and Sea-based (including Industrial, Domestic and Others) .....	123
5.2.1.1	Land-based Sources of Plastics .....	124
5.2.1.2	Ocean/Waterway-based Sources.....	125
5.2.2	Qualitative and Quantitative Estimates of Plastics in the Marine Environment - Global Scenario .....	125
5.3	Impacts of Plastic Disposal in the Sea on the Coastal and Marine Environment and its Resources .....	127
5.4	Plastic Disposal Policies around the World and their Implementation.....	131
5.4.1	Policies under International Conventions.....	131
5.4.1.1	International Convention for the Prevention of Pollution from Ships (MARPOL 73/78) .....	131
5.4.1.2	Convention for the Prevention of Marine Pollution from Dumping of Wastes.....	133
5.4.1.3	Basel Convention on the Transboundary Movements of Hazardous Wastes and their Disposal.....	133

5.4.1.4	Agenda 21 and the Johannesburg Plan of Implementation.....	134
5.4.1.5	Convention on Biological Diversity, with the Jakarta Mandate.....	134
5.4.1.6	Global Programme of Action for the Protection of the Marine Environment from Land-based Activities.....	135
5.4.1.7	Food and Agriculture Organization Code of Conduct for Responsible Fisheries .....	135
5.4.1.8	Other Global Actors and Initiatives .....	136
5.4.1.8.1	Intergovernmental Oceanographic Commission of United Nations Educational, Scientific and Cultural Organization .....	136
5.4.1.8.2	Joint Group of Experts on the Scientific Aspects of Marine Environmental Protection.....	136
5.4.1.8.3	International Coral Reef Initiative .....	137
5.4.2	Policies under National Laws/Acts/Rules .....	137
5.4.2.1	Polyvinyl Chloride Policies around the World..	137
5.4.2.2	Policies/Regulatory Instruments for Plastic Bags .....	137
5.4.2.3	Joint Plastic Disposal Policies in Association of the Southeast Asian Nations, East African Region, the G9 Group of Countries, European Countries and South Asian Region .....	149
5.4.2.3.1	East Africa Region.....	150
5.4.2.3.2	G9 Group of Countries .....	150
5.4.2.3.3	Other European Countries .....	151
5.4.2.3.4	South Asian Region .....	152
5.4.2.4	Plastic Disposal Policies in Other Countries ....	152
5.4.2.4.1	Australia.....	152
5.4.2.4.2	Bangladesh .....	153
5.4.2.4.3	China .....	153

5.4.2.4.4	Denmark .....	153
5.4.2.4.5	Eritrea .....	153
5.4.2.4.6	India .....	154
5.4.2.4.6.1	Plastic Waste Management and Handling Rules, 2011 ...	154
5.4.2.4.6.2	Role of the Implementing Authority	155
5.4.2.4.7	Ireland .....	158
5.4.2.4.8	Italy .....	158
5.4.2.4.9	Rwanda.....	159
5.4.2.4.10	Somaliland .....	159
5.4.2.4.11	South Africa .....	159
5.4.2.4.12	Taiwan .....	160
5.4.2.4.13	USA .....	160
5.5	Impact of the Policies and Legal Framework on Plastic Disposal.....	161
5.6	Conclusions .....	163
5.6.1	Plastic Bag Tax/Levy - Case Study .....	164
5.6.2	The 3R Concept and Waste Prevention.....	167
6	Future Trends.....	175
6.1	Monitoring and Predicting Biodegradation and Deterioration of Polymers.....	175
6.1.1	Introduction.....	175
6.1.2	Analytical Tools.....	176
6.1.2.1	Polymer Characterisation.....	176
6.1.2.2	Surface Analysis.....	179
6.1.2.3	Bulk Techniques.....	183
6.1.2.4	Biofilm Characterisation .....	185
6.1.3	Mathematical and Molecular Models .....	188
6.1.3.1	Modelling of Biofilms .....	188

6.1.3.2	Modelling of Biodegradation .....	190
6.2	New Material Design – Structured Material/Biodegradable Polymers .....	191
6.2.1	New Age Materials .....	191
6.2.2	Polymeric Composites.....	192
6.2.3	Nanotechnology and Bio-nanotechnology .....	192
6.3	Conclusions .....	193
	Abbreviations.....	199
	Index .....	207
